Work History

2023-03 - 2023-08

Software Developer Intern

Infostructure Department Universiti Teknologi Mara Cawangan Johor , Kampus Segamat, Johor

- Developed a responsive web-based online lecture exemption application system that is accessed by 2000+ students using HTML5 , CSS3 , Javascript , PHP and SQL.
- Designed and implemented an innovative system that transformed the previously manual and time-consuming lecture exemption application process, which typically required over 3+ days and significant paper usage, into an efficient 20-minute process
- Successfully integrated the system with PHPMailer, a trusted third-party email sender, to enhance email communication and delivery capabilities
- Continuous integration , debugging , testing and deployment for client use

Education
